Profile

Summary

A pragmatic full-stack developer passionate about simplifying lives through tech. I bridge technical and non-technical worlds, ensuring computers handle complexity so humans can create. Seeking opportunities to grow and collaborate in innovative teams.

Personal Qualities:

- Excellent communicator and relationship builder.
- Critical thinker with strong attention to detail.
- Results-driven with a focus on meeting deadlines.
- Adaptable and resilient under pressure.

Skills

Key Skills:

- **Full Stack Development**
HTML, CSS, JavaScript, TypeScript, React.js, Node.js, Git, WebAPIs, SQL, jQuery, XML and XSLT.
- **UX/UI Design**
Figma, Adobe Photoshop, prototyping, wireframes and user testing.
- **Client Interaction**
- **Technical Project Leadership**
- **Problem Solving**
- **International and Remote Collaboration**

"Dylan's ability to engage with complex problems and devise effective solutions was truly remarkable. Not only could he handle the technical aspects of his role with high efficiency, but he also excelled in client interactions. His capability to understand and articulate client needs helped in delivering services that were well-tailored and appreciated, earning him admiration not only from clients but also from peers."

— Ian Downey (Juvare APAC General Manager)

Work Experience

Juvare

Global company offering SaaS products for Emergency Management

Software Developer (Contract)
